| Operations and Algebraic Thinking |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Use the four operations with whole numbers to solve problems. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 1. Interpret a multiplication equation as a comparison, e.g., interpret $35=5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5 . Represent verbal statements of multiplicative comparisons as multiplication equations. | - | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | - |  | - | - |  |  |  |  |  | $\bullet$ |
| 2. Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison. | - | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | - |  | - | $\bullet$ |  |  |  |  |  | $\bullet$ |
| 3. Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. | - | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | - |  | - | - |  |  |  |  |  | $\bullet$ |
| Gain familiarity with factors and multiples. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Understand properties of multiplication and the relationship between multiplication and division. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4. Find all factor pairs for a whole number in the range 1-100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range $1-100$ is a multiple of a given one-digit number. Determine whether a given whole number in the range 1-100 is prime or composite. | - | - | - | $\bullet$ | $\bullet$ | - |  | $\bullet$ | - |  |  |  |  |  | $\bullet$ |
| Generate and analyze patterns. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 5. Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not expliciti in the rule itself. For example, given the rule "Add 3" and the starting number 1 , generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way. | - | - | $\bullet$ | $\bullet$ | $\bullet$ | - |  | - | $\bullet$ |  |  |  |  |  | $\bullet$ |

Alignment of Writing Strategies with Selected Common Core Standards

| Number and Operations in Base Ten |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Generalize place value understanding for multi-digit whole numbers. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 1. Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that $700 \div 70=10$ by applying concepts of place value and division. | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  |  | $\bullet$ |  |  |  |  |  |  | $\bullet$ |
| 2. Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multidigit numbers based on meanings of the digits in each place, using $>,=$, and < symbols to record the results of comparisons. | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | $\bullet$ |
| 3. Use place value understanding to round multi-digit whole numbers to any place. | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | $\bullet$ |
| Use place value understanding and properties of operations to perform multidigit arithmetic. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4. Fluently add and subtract multi-digit whole numbers using the standard algorithm. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | $\bullet$ |
| 6. Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | $\bullet$ |

Alignment of Writing Strategies with Selected Common Core Standards

| Strategies <br> Common Core Stds |  | N |  |  | $\begin{aligned} & \text { 증 } \\ & \text { 응 } \\ & \text { 으 } \\ & \text { 2 } \end{aligned}$ |  |  |  |  |  | - |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number and Operations Fractions |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Extend understanding of fraction equivalence and ordering. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 1. Explain why a fraction $\mathrm{a} / \mathrm{b}$ is equivalent to a fraction $(\mathrm{n} \times \mathrm{a}) /(\mathrm{n} \times \mathrm{b})$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. | - | $\bullet$ | $\bullet$ | - | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | - |
| 2. Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1 / 2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model. | - | - | $\bullet$ | - | $\bullet$ | - |  | - |  |  |  | $\bullet$ |  |  | $\bullet$ |
| Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3. Understand a fraction $\mathrm{a} / \mathrm{b}$ with $\mathrm{a}>1$ as a sum of fractions $1 / \mathrm{b}$. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. Examples: $3 / 8=1 / 8+1 / 8+1 / 8$ $; 3 / 8=1 / 8+2 / 8 ; 21 / 8=1+1+1 / 8=8 / 8+8 / 8+1 / 8$. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| c. Add and subbract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Alignment of Writing Strategies with Selected Common Core Standards

| Strategies <br> Common Core Stds |  | N |  |  | 즌 응 응 ㄹ |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number and Operations - Fractions (continued) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| a. Understand a fraction $\mathrm{a} / \mathrm{b}$ as a multiple of $1 / \mathrm{b}$. For example, use a visual fraction model to represent $5 / 4$ as the product 5 x (1/4), recording the conclusion by the equation $5 / 4=5 \times(1 / 4)$. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| b. Understand a multiple of $\mathrm{a} / \mathrm{b}$ as a multiple of $1 / \mathrm{b}$, and use this understanding to multiply a fraction by a whole number. For example, use a visual fraction model to express $3 \times(2 / 5)$ as 6 $x(1 / 5)$, recognizing this product as $6 / 5$. (In general, $n \times(a / b)=$ ( $\mathrm{n} \times \mathrm{a}) / \mathrm{b}$.) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. For example, if each person at a party will eat $3 / 8$ of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie? | - | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ | $\bullet$ |  | $\bullet$ |  |  |  |  |  |  | - |
| Understand decimal notation for fractions, and compare decimal fractions. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 5. Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100.4 For example, express $3 / 10$ as $30 / 100$, and add $3 / 10+4 / 100=34 / 100$. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 6. Use decimal notation for fractions with denominators 10 or 100 . For example, rewrite 0.62 as $62 / 100$; describe a length as 0.62 meters; locate 0.62 on a number line diagram. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 7. Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>,=$, or <, and justify the conclusions, e.g., by using a visual model. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

| Measurement and Data (continued) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 6. Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 7. Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Geometry |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Draw and identify lines and angles, and classify shapes by properties of their lines and angles. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 1. Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in twodimensional figures. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 2. Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3. Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
