Mm Metamorphosis, Male, Mutualistic Relationship, Monarchy

Nn nectar

Oo

Pp Pupae, Phases, Pattern, process

Qq Queen

Rr Reproduction, Regurgitate, Retention

Ss Social, Stinger, Sixteen, Smell, Six

Tt Thorax, Twenty Four, Three

Uu

Vv venom

Ww workers, weeks, wings

Xx

Yy yellow

Zz

The life and attributes of a bee.

All bee's begin their journey as a pupae. Zach
This pupae was layed by a queen into a cell.
The pupae grows fast and takes the entire space of
the cell. The cell is then sealed. As the bee hatches
it breaks the cell. It's job is preassigned, it will
either be a worker drone or queen.
